

FIBRE INSPECTION SCOPE

Our handheld fibre optic inspection scope is a portable video microscope used to examine fibre terminations and ensure terminations are smooth and clean. This great little gadget can inspect all kinds of fibre optic cables and components eliminating the need to dismantle equipment.

Key Features:

- Stand-alone video inspection scope with a high resolution LCD display that shows fibre endface anomalies in detail.
- Ergonomically designed controls for easy one-hand operation.
- Various precision inspection adapter tips available.
- High precision 3.5" TFT LCD Display Screen with brightness adjustment when inspecting endface for clear view.
- Shatter resistant, anti-slip and wear resistant.
- Available for USB 2.0 interface on PC and data saving.
- Protects your eyes form exposure to live fibre links.

Spec:

Optical Magnification	250 times
Resolution Ratio	0.5 um
Weight	1.5 kg
Display Screen	3.52" TFT-Display Screen LCD
Video Output	NTSC/ PAL
Power Supply	Rechargeable Battery

What's available

Kit 1:

The standard adapter tips (to cover ST connectors, SC, FC, LC patch lead and adapter ends), battery pack, inspection probe microscope with high-resolution LCD display unit presented in a protective carry case. * All kits comes with a protective carry case as shown in Kit 4 below.

Kit 2:

The standard adapter tips (to cover ST connectors, SC, FC, LC patch lead and adapter ends), battery pack, inspection probe microscope with high-resolution LCD display unit presented in a protective carry case with additional cleaning kit. The cleaning kit includes a cleaning cassette box, 2.5mm adapter/ connector cleaner (suitable for ST, FC and SC adapters and connectors) and a 1.25mm adapter/ connector cleaner (suitable for LC adapters and connectors).

Kit 3:

The full compliment of adapter tips (to cover ST connectors, SC, FC, LC, SCAPC, LCAPC patch lead and adapter ends), battery pack, inspection probe microscope with high-resolution LCD display unit presented in a protective carry case.

Kit 4:

The full compliment of adapter tips (to cover ST connectors, SC, FC, LC, SCAPC, LCAPC patch lead and adapter ends), battery pack, inspection probe microscope with high-resolution LCD display unit presented in a protective carry case with additional cleaning kit. The cleaning kit includes a cleaning cassette box, 2.5mm adapter/ connector cleaner (suitable for ST, FC and SC adapters and connectors) and a 1.25mm adapter/ connector cleaner (suitable for LC adapters and connectors).
