

# OPTICAL POWER METER

Our handheld optical power meter combines many functions into one unit and it can be used for both absolute optical power measurements and relative loss measurements. It's compact and lightweight design means it's the perfect addition to your kit bag and comes with 3 handy patch leads and a soft protective carry case. The patch leads supplied are FC-FC, FC-LC and FC-SCAPC.

## Key Features:

- Supports both absolute optical power measurements and relative loss measurements.
- High precision user automatic calibration function.
- Dustproof button membrane on touch buttons.
- High precision 0.01dB resolution for accuracy.
- Shatter resistant sleeve for protection against drops, shocks and wear.

## Spec:

Measurement Range	-50~+26dBm
Resolution	0.01 um
Weight	200g
Wavelength	800~1600nm
Calibrated Wavelength	850/980/1300/1310/1490/1550nm
Power Supply	Alkaline Battery(3 AA 1.5V Batteries)
Dimension	152x74x26mm
